Jakarta Timur, DKI Jakarta • leandrabelva26@gmail.com • (+62) 852 9336 2615

Objectives

Computer Science undergraduate at BINUS University with a strong interest in Big Data Processing and Analytics, Backend Development, and Database Technology. I am seeking to gain experience and knowledge to broaden my skills through organizational and real world projects, while continuously improving my technical capabilities to work well in a team.

Skills

Languages: English (B2 Level), Spanish (B2 Level)

Hard Skills:

- **Data Engineering/Big Data:** PySpark, Hadoop HDFS, Pentaho Data Integration, MySQL
- **Programming Languages:** Python, PHP (Laravel)
- **Data Visualization:** Power BI
- **Productivity:** Microsoft Excel, Word, PowerPoint

Soft Skills: Strong Communication, Adaptive, Teamwork, Analytical Skills, Detail-oriented

Education

Colegio Madrid - Fundación Santa Maria

Madrid, Spain

High School

Oct 2021 - May 2022

Has completed 11th grade of high school education and graduated in Mathematics and Natural Sciences (Ciencia) with a very good average final grade.

Sekolah Indonesia Den Haag

Den Haag, Netherlands

High School

Jun 2022 - May 2024

Has completed high school education and graduated in Mathematics and Natural Sciences (MIPA) with a very good average final grade (Diploma).

BINUS UNIVERSITY

Jakarta, Indonesia

Undergraduate Computer Science

Jun 2024 - Current

Undergraduate student in Computer Science (Streaming in Database Technology) with a GPA of 3.41 / 4.00.

Experience

Distributed Big Data Analytics & Credit Risk Prediction Platform

BINUS University, Jakarta

FINAL PROJECT BIG DATA PROCESSING

Jan 2026 - Jun 2026

- Developed an end-to-end distributed data processing pipeline and machine learning system utilizing PySpark and Hadoop HDFS to predict credit default risk.
- Processed a large-scale financial dataset containing over 300,000 customer records within a collaborative group project.
- Implemented an ETL framework to clean, integrate, and transform complex historical attributes.
- Optimized model training for severe class imbalances and deployed a Random Forest Classifier that achieved a 0.74 AUC score to identify critical risk drivers.

Optimizing Clinical Data Management from Dark Data Identification

BINUS University, Jakarta

Using ETL Pentaho

Jan 2026 - Jun 2026

FINAL PROJECT DATA ENGINEERING

- Architected an automated end-to-end ETL pipeline using Pentaho Data Integration to isolate clinical "Dark Data"

and optimize dataset efficiency.

- Designed a MySQL Star Schema with optimized Fact and Dimension tables to eliminate structural redundancy and accelerate database processing.
- Scheduled a continuous 30-second automation streaming loop within Pentaho to eliminate manual database intervention and mitigate data processing lag.
- Integrated the data warehouse with Power BI reporting dashboards for active patient demographics to maximize analysis efficiency and performance.

**Freelance FullStack Laravel Website
EMMA TRAVEL**

Jakarta
Sep 2025 - Dec 2025

- Designed and engineered a full-stack travel website for an Umroh Travel Company ("Emma Travel") by implementing Laravel for the backend architecture.
- Applied comprehensive backend development principles acquired from the BNCC (BINUS Computer Club) intensive course.
- **Github Repository** : <https://github.com/leandrabelva/emmatour-website.git>

Organizational Experience

**Activist of First Comission – Responsive
Himpunan Mahasiswa Teknik Informatika (HIMTI) BINUS**

Jakarta
Jul 2024 – Current

- **Comittee of TECHNO HIMTI 2025 (Event Division)**
Coordinated the execution of TECHNO HIMTI 2025 by scouting keynote speakers and structuring the event timeline.
- **Permanent Activist of First Comission (Responsive)**
Play an active role in preparing materials and delivering learning topics in a structured manner for Mid Exam and Final Exam preparation.

**Freshmen Leader and Freshmen Partner
BINUS University**

Jakarta
Jun 2025 - Dec 2025

- Actively participated in the First Year Program (FYP) as a Freshmen Leader (FL) and Freshmen Partner (FP) to mentor incoming students.
- Guided new incoming students through their academic and campus transition, organized community building activities, and served as a primary resource to foster a supportive learning environment.
- Served as a primary resource person, demonstrating strong leadership, public speaking, and interpersonal skills to manage diverse student groups effectively.

Achievement

- Completed Intensive Course "Backend Developer" training program by BNCC (BINUS Computer Club), mastering core database using Laravel and backend architecture principles.
- Flag Raising Troops - Embassy Of The Republic of Indonesia in Madrid, Spain.
- Participation in the First Multicultural Parade 2023 by the Board of Directors of the wives of accredited attachés in the Kingdom of Spain.
